Comments: We support the Roadless Rule for the Tongass Forest and are 100% against any repeal efforts that protect our national forest here in southeast Alaska. We are opposed to old growth commercial logging and road building that threaten old growth trees. The local impacts from old growth logging does nothing to benefit our communities, old growth logging threatens community use of the forest for fishing, hunting, tourism, and subsistence use. The trees leave forever, jobs leave soon after the industrial logging, just stumps remain. Logging does not bring sustainable growth and jobs to the communities, just boom & bust! The Tongass is very important to our world for keeping the carbon captured and slowing green house gasses from warming our planet. Climate change is real, we need to protect our watersheds and our Southeast communities. This is bad policy and politically driven by corporate greed. Please stop this madness!
