Comments: Attention we need to protect the Tongass national Forest I do not want anyone clear cutting those trees because it's like another rainforest of North America and trees are very important to the environment for wildlife to live in and plus I went on an Alaskan cruise there last summer. Don't let anyone roll back protections for this place, and Trump needs to face a lot of punishment for environmental rollbacks. It is such a beautiful place to explore not for timber. If you start cutting down a lot of these trees, then everybody is in big trouble so let the wildlife thrive there.
