Comments: More commercial logging??? The only ones who win with this are the logging companies! The animals who rely on the trees, they lose. Humans too. I would propose leaving the majority of public lands to have the chance to be old growth again! Drastically REDUCE commercial logging on public lands! As our climate changes, and the world gets hotter, we need these trees and forests like our lives depend on it...because it does. Let's rethink logging practices and giving public lands to logging companies at a price subsidized by taxpayers!
