Comments: Thank you for the El Cap recreation improvements last year. Well done! Have really enjoyed visiting/using. Thank you also, for the Sunnahae trail improvements. I use this trail weekly all year long, as do many others from Craig and Klawock. The area between the woods and muskeg around the 1.8 mile area is VERY wet continuously, now. And thus, very icy in the cold temps. Needs some improved drainage or raised boardwalks. Hope you can start in that area sooner than later. And brushing back is needed in multiple areas along the 2nd mile of the trail. Look forward to improvements someday above the 2 mile rock - as I have not been successful in transiting that area, due to mud and slippery logs. I think many trail users would be willing to assist in some coordinated work days on that trail. I know I carry some snips all through the summer, trying to do my little part to keeping the trail passable. Would love to see a Facebook group set up for Sunnahae Trail users. Think you'd have lots of photos submitted to show off that area!
