Title:

Comments: Although I do not live in that area I nonetheless visit the area for personal vacations. I enjoy the natural beauty of the area, and the plentiful wildlife, especially the large predators, such as wolverine, wolf, cougar and grizzly bear. A project such as this will i all probably have an adverse effect upon the native wildlife, as it will destroy much of the habitat. I am hereby requesting that an environmental impact statement be performed be performed, and the results published.
