Title:
Comments: I am strongly objecting to this mining proposal for the following reasons:
1. Waterways, lakes, rivers, streams contamination at the public tax payer expense to fix after detection.
2. Traffic congestion and damage to interior and exterior road ways incurred by logging and contued mining that will fall on tax payers to repair and mitigate after the damage and issues have been determined.
3. Exhausting/unlimited use of water, energy, and fuel consumption for mining that will result in unplanned increases in county fees to the tax payer.
4. The county proposal does not include who is profiting on this project in order for the citizens to have an opportunity to evlute for conflicts of interest
5. Ingress and egress road construction to and from mining sites have not been disclosed for the public to know how and where it may impact through travel or businesses withing the proximity of main highways.
6. Blasting/explosives use is not disclosed.
