Comments: As a resident of Arkansas, our natural spaces are part of what makes us uniquely the natural state. To introduce a mining operation such as this will serve no good but to enrich people who do not live here and do not care about what makes our state great. Many of us explore and enjoy natural spaces. Many more of us live within proximity to one. The impact something like this will have on our natural environment is not worth any amount of potential tax revenue or job creation.
