Comments: Hello, I'm writing to express my objection to the Tongass forest service management plan. The area is around Barnoff Island, and Krusoff Island are designated as commercial use. These are public lands and should not have such a designation. These have forest service cabins which are not commercial use. Krusoff island should also remain a special designation forest. I believe these changes benefit, the timber industry which provides almost no jobs in the area and inflicts long-term harm to our economy in Sitka.
