Comments: As a former resident of Cassia County, I fully support the reopening of the Black Pine Mine. It is a great opportunity for the county and all surrounding counties as it will bring in much needed job opportunities. I know that all steps have been taken to ensure its success upon reopening because my son went with a group of boys from the Raft River Valley when we still lived in Raft River up to the mine sight and spoke with one of the personnel doing the testing for reopening. We were all quite impressed with the potential that was talked about with those boys. I know that the mine will benefit the state of Idaho as a whole and will even reach farther in time to bless our great nation. As an Idaho resident of the neighboring Minidoka County, I fully support the reopening of Black Pine Mine and pray that it will go forward in the near future.
