First name: William

Last name: Hughes

Organization:

Title:

Comments: Shut it down! In a culture valuing only money and celebrity and motivated only by greed, the MAGA Republican Party's energy policy is focused exclusively on fossil fuels which combined with their systematic gutting of environmental regulations has resulted in a winter with no snow-pack in the age of irreversible climate change. Agricultural interests will suffer as a result.

The mindless assault on our public lands will continue as the FS is being relocated to SLC where the tax exempt corporation headquartered there continues to operate on an agenda directed by the 1845 delusions of Manifest Destiny. They have failed massively to be competent stewards of God's creation, and killed whole lot of indigenous people over the years.

This pathological exploitation of resources and tragically failed retrograde agenda is why the Colorado River is drying up, Lake Powell a deadpool, and The Great Salt Lake a bowl of toxic dust.

You've trashed Utah, so stay TF out of Idaho.

Reject the malicious destruction of Black Pine.
