Comments: I am hearing of this rezoning change through a well known Olympic skier that has her home town of Strawberry, CA. If I could offer my observation through what goes on with Bass Lake every Summer.

Granted that it is partially to blame through PGE's effort to drain the lake every winter to lower levels and thus when water does get topped off you have the influx of jet skiers risking wildfire, pollution from the summer vehicles, and the wildlife suffers for it. Why? Because of the all mighty and greedy dollar from those wanting this change. Enough is enough! Preserve something for future generations to enjoy without looking at a concrete jungle in the sierras!
