Comments: I oppose this rule change, Pinecrest is in need of better care, not more commodification. Its a popular part of the stf, and because it is part of the stf, it is part of public lands. And fs mgmt of public labds is guided by the principle of the best use, for the most, for the longest time, yes I am paraphrasing. This place is for the people and the ecology its supports, it is also for the people who living and work there, but that must be balanced, not adjusted or modified to make it more profitable for particular parties. Pinecrest is many things to many people and it had changed a lot of the years, but making it more of a theme park and less of a natural place for people to go and be in nature would further degrade it. It is a tough place to manage, no doubt, but changing it for commercial reasons, especially these days is not prudent nor wise. Now I could prattle on and elucidate further, but theres no need to, in short I fully oppose this change to zone and such.
