Comments: As a Resident of Malta I cannot express how excited about this project. I have been working in the Mining industry in the Elko Area for the last 15 years and have seen personally the positive impact that mining creates for communities and regions.

Miners understand that safety is above everything first

environmental. stewardship is a keystone of mining we understand that if we do take care of the environment then land can't take of us and the support of our families

The positive economic impact the mining brings is wonderful not only does it support local jobs but it brings in a lot of contract work as well creating wonder opportunities for a lot of people

I hope this project continues successfully it will only strengthen this community and region
