Comments: I was really glad to hear about the Black Pine Gold Project. It's exciting to think about the jobs it could bring to our area and the chance for people who had to move away for work to come back home. I'd love to see more families settling here and more students in our schools.

Strong local jobs with good pay and benefits would be a big positive for our community. Opportunities like this give young people a reason to stay and build their future close to home.

I also appreciate the importance of doing this work responsibly and taking care of the land and the people who live here. I'm hopeful this project will be a positive step forward for our community.

Thank you for the opportunity to share my support.
