Title:

Comments: I support parts of this project - thinning to reduce fire risk near private property and restoring hardwoods in woody draws - I am concerned that the scale of commercial timber harvest and associated roadwork will negatively impact the Chalk Buttes' undeveloped character. The Chalk Buttes not only provides unique recreation opportunities to our community but also hosts some unique, rare species of plants found in few other locations in this part of the state.

I would like to see more outreach and focus on the environmental impacts of this project.
