Comments: Hello

I am writing to submit comment and concern about this proposed project. While some of the proposed actions are helpful; thinning to reduce fire risk near private property and restoring hardwoods in woody draws, I am concerned that the scale of commercial timber harvest and associated roadwork will negatively impact the Chalk Buttes' undeveloped character. I am also concerned about building new "administrative access" roads for this project, which will disrupt the ecosystem and well as wildlife habitat.

Thank you for considering these comments.
