Comments: The 2025 Mt. Baker Geothermal Consent to Lease (CTL) Draft Environmental Assessment (EA) analyzes leasing ~83,378 acres of National Forest System land, I want the forest service to focus on stipulations to protect resources rather than authorizing ground-disturbing development. I want the No Surface Occupancy (NSO) areas, and environmental impacts !

For heavens sake. We were given a gift of our gorgeous country, and there is SO LITTLE left! Can't we just keep enough in it's natural state so we have hope of a future with natural untouched lands ?

For clean air clean water and healthy plants and animals!! Let's think of the future, and conservation.
