Comments: Regarding Burnt Rock Exploration #69000, I object to this project to mine for gold. This is a beautiful wilderness area that will be destroyed in many ways; wildlife disturbance, plant destruction and disturbance, and contamination of a pristine area with mining chemicals that will take decades to recover if ever. We have chased most wildlife out of many Owens valley areas already. I would like to see the areas that remain undisturbed serve as a home for that wildlife complete with plants for grazing and shelter.
