Comments: These trails seem like a great idea, but don't we have enough windy, switch backing connector trails??

How about let's mix it up and make something fun!? Something progressive, something fall line, something challenging that people will actually come back for.

We don't need 3-6 switchbacks on a 300' decent. It's boring to run, and it's boring to pedal, in either direction.

People want a challenge. People want something that we aren't already offering 700 miles of.

Let's get crazy. Throw a rock garden in there. Maybe even a step down? Just one. Please.

We have enough commuter trails. We are more than satisfying the cross country needs. Please, please, please, give us something fun to ride! Something to progress on.

We are so so so far beyond all of the surrounding counties with what our trails have to offer. Let's up our game!
