Comments: The Benchmark project seems to violate the FS mandate concerning sustainability. My primary concern is the removal of all the large seed trees and what I would consider to be over logging. I would rather see the forest managed by professional foresters than by politicians and industry people that are only concerned with short term profits and not the long term health of the forest, and it's impact on tourism, wildlife, and the quality of life for everyone that lives here and enjoys and use the forest for all sorts of outdoor activities. Please take all of us that love the forest into consideration and don't just treat it like a tree farm that exists only to earn money for the logging industry.
