Comments: To whom it may concern:

I'm against the building of a geothermal energy site in the Mt. Baker Snoqualmie National Forest because this area has been designated as a recreation area for the people of Whatcom County and for visitors from all over the U.S. As a former Wilderness Ranger, I've seen countless people in this area enjoying the outdoors. To build a Geothermal site would disturb the ground, add noise, affect the animals, birds, trees, and our visitors.

We already have hydroelectric power in the area. Many people have solar. Let's get energy without impacting our Natural Resources that are used for animals and humans.
