Comments: I love Yellowstone with all of my heart. This summer I have my dog with me and due to preservation and safety reasons she's not allowed to hike with me in the park however right outside of the park is still beautiful and she loves going for walks up jardine. If this act is to go through , the loud logging trucks will not only deter her from wanting to walk (she's terrified of loud noises) it will also at the same time be disturbing every animal who has made a territory in the vicinity. There is so much wildlife in jardine , bears, wolves, coyotes, foxes, deer, elk, and moose. Building 8 miles of new road not only physically affects these animals by taking their tree cover down, the noise pollution from the trucks will scare them off. This is just one of the few reasons to oppose this I believe if they are able to start this project it will always continue each year they will keep proposing new roads to build more acreage to strip of its trees. I do not support these acts and we must put a stop to it before it's too late.
