Title:

Comments: Waterville Valley has always has protected the environment. We believe the expansion plan is sensitive to the environment and the joy of recreation. The proposed enhancement of the valley to mountain gondola certainly cuts down on the environmental impact of auto transportation to the mountain. The expanded trails on green peak provide a greater opportunity for family and beginner skiing and a love of the the outdoors during the winter season.

We are in full support of the project and the communities ability to co-exist with nature.

Thank you,

Respectfully

Kevin J Walsh & Family
