Comments: Based on climate change I can't support the expansion....also the town of Waterville Valley cannot handle this expansion with the demand on the towns infrastructure....at the present time we are faced with a major tax increase which I know the forestry department doesn't care about with that said this town is almost built out and the disruption of the gondola construction on the town is ruining the quaintness of Waterville Valley . What happens if the ski area fails (lack of water for snow making which Town offers with the expensive cost to the town to dredge the pond) and mostly the owners of the resort and areas within the town floor don't consider the expense to the town for the resorts benefit
