Comments: To whom it may concern:
I'm writing in objection to your permit system proposal for the Flathead River water shed. While I agree the river has become crowded the ones who will continue to profit from the proposed permit system are the outfitters. I believe the outfitters should be required to no only purchase a permit but a cap should be placed on the amount of rafts and people they are allowed to take on the river daily. As they are the ones making profit of a public water share. I think the average recreational user should not be required to obtain a permit as we are using it to enjoy our water shed with family or friends. Thankyou for your time and consideration in this matter.
Sincerely a concerned user of the flathead watershed,
Jared Wright
