Comments: I would like to object to the Timber Sale as outlined by the forest service. At a time when we should be preserving our natural resources such as intact forests that still exist and can be used as carbon sinks for climate change reduction, provide habitat that many species depend on and that negatively affect our natural resources such as salmon which many citizens, indigenous and non-indigenous, use for their food source and income through both recreational and commercial fishing, cutting down these forests just doesn't make sense, economically or ecologically. I object to this sale.
