First name: Juli

Last name: Ames-Curtis

Organization:

Title:

Comments: The Benchmark Vegetation Management plan is good in its inclusion of prescribed fire and pre commercial thinning. Commercial logging has no place in this area as it has been logged fully already. This is an area of the forest that is in regeneration growth and needs to be left alone from commercial logging for decades if the forest is to be healthy. I attended a forestry school and have some knowledge of healthy resources.

Juli Ames-Curtis

BS Resource Management and Biology, University of WI Stevens Point.
