Title:

Comments: Please don't do this! Hasn't our planet been through enough? Why must we excel in greed and not valuing the planet we live on?! Isn't the planet, our home the biggest commodity we have? It's a domino effect and affect to the planet! I emlore you to please take into consideration what impact this will have, to us, to wildlife, to plant life. We need to have some respect for the planet that keeps us alive, stop treating her like a 2 dollar prostitute!
