Title:

Comments: We do not need .ore fires, especially intentional "prescribed burns" SLC already has some of the worst air quality in the nation with the inversions . My parents still live in SLC, and I am a current resident of Ut. myself. I am opposed to things that are not natural. If you want to do something , then just clean up the dead trees and shrubbery, don't burn is and put all that smoke in there air and burn healthy trees and shrubs.
