First name: Voneta Neill

Last name: Voneta Neill

Organization:

Title:

Comments: This needs to stop. Trees take many, many years to get to maturation, and if they're cut down, you're reducing protection for the saplings growing around them, thus reducing the chance for those saplings to mature. Also, mature trees provide shelter for wildlife, as well as food. They also purify the air. Deforestation is detrimental to the environment in a variety of ways, these being only a few. Stop this destruction of our national forest.
