Comments: I find it disheartening that the BLM is willing to turn our beautiful national parks, home to many indigenous species, stop overs for migrating birds, and heritage sites for indigenous peoples into industrial polluting landscapes for the sake of profiteering. From the mouth of our president himself, he stated that we currently are the largest oil and gas produces in the world. If so, then why does the BLM intend to allow the destruction of our national parks, which are supported by my tax dollars? This is greed at its worst and shows complete lack of respect for our country, its people and the earth.
