Title:

Comments: Please do not make our situation worse by using 'preventive' burns in our watersheds like Big or Little Cottonwood canyons. Personally, I live in Sandy and have COPD. As a whole, this project goes against all ecological science. While taking away carbon absorbing live trees you are also putting MORE carbon in the air and allowing it to flow down into the valley. Ignoring science is how we got into this situation to begin with. When will we realize what we are doing as a holistic society? Leslie Nelson
