Comments: We live in Colorado because of the beautiful mountains and fresh air. It is a lifestyle. We do not want it polluted just to line billionaire's pockets. Everyone has seen how mines and other drilling operations have impacted our clean water supplies. Say what you will, but history has proven these operations can result in disasters. We don't need more drilling. We need more investment in true clean energy. Stay off our lands! Keep them wild and free like they were intended. Do not ruin our beautiful state for profit.
