Title:

Comments: My name is Kim Agnew. I live in Sandy Utah. I just found out about this prescribed burn up Cottonwood Canyon. Given how dry we are this year and the severe drought that we are in I think this is insanity. Please at this point in time do not do a prescribed burn up big cottonwood Canyon. There's too much to lose if it gets out of control as they often do. Hold off until weather conditions change we have more moisture in the hills and the valleys surrounding the area.

Thank you for taking this into consideration.
