Comments: I am still trying to wrap my head around the Benchmark project which proposes a project area that encompasses 38,003 acres on the Northern Hills District of the Black Hill National Forest. From what I understand, a good share of these acres have been entered two and three times since 2002. To propose another entry, much less the size of the Benchmark project, is not good stewardship of the land the District is entrusted to manage. I do not like this proposal but please keep me informed as it progresses through the scoping process. Thank you.
