Comments: I am a Saline county residents, I highly disagree with this proposal of mining for quartz in the Ouachita National Forest. I do not think it is necessary to risk the homes of wildlife in the forest or the rivers/creeks. We are the natural state and we love the wildlife here. Our top priority in this state should be to protect them especially in a national forest. Forest should not be sold. It is scared lands to people who love nature. Please stop this proposal. Also I highly doubt Saline county residents would like to have higher water treatment cost of water bills due to the greediness of big corporations
