Comments: Hello

I demand that you hold a public hearing AND extend the public comment period for a massive proposed mine on public lands near Helena. My partner is a geologist and the one thing he always says is that it is never good when things like this are fast tracked. We need to make sure everything is done properly and with proper input from the community and transparency. Be respectful, extend the comment period, be transparent and listen to the community who's backyard this is in.

I personally do not want this mine in my backyard but I especially don't when the community is not taken into consideration.
