Comments: I am submitting comments on The Blue Copper Mountain Project #363864

This project will impact the Little Blackfoot watershed, will extract up to 24,000 gallons of water/day to support the drilling and will affect the habitat of the locals - bull trout, grizzly bears, lynx, wolverines and Montana native plants and pollinators.

The public deserves the ability to review an EIS and be able to comment on it and this project.

Thanks
