Title:

Comments: I am strongly opposed to this mining operation. I have valuable water rights from Snowshoe Creek that are below the exploration zone consequently our rights would be severely damaged by the extraction of 24,000 gallons per day, not to mention the likely contamination caused to the water table as that water runs back into the ground. In addition the daily traffic up and down Snowshoe Creek Rd would be incredibly intrusive to our daily lives. We moved to this remote location to be away from the daily fracas of cars, trucks, noise, dust, etc. We will be in contact with our elected representatives to amplify our opinions.
