Comments: I oppose the Cottonwood Canyon Restoration Project. The health of our community is more important than thinning out the trees in the canyon. With all the fires we are having now and the terrible air quality we have in Utah with the inversion and wild fires we do not need more smoke in our air causing our citizens health problems. There are many vulnerable people in our community with asthma and other respiratory illnesses that are particularly affected by increase smoke in our air. Even healthy people are affected by increased smoke in our air. Please consider the entire community and how you are endangering the people who live here by having prescribed burns. Thank you.
