Title:

Comments: I have read UPHE's objections and I agree. There seems to be other steps that can be taken in the canyon that will be helpful. I'm extremely worried about our air and water. These burns will certainly have a negative impact on both of those things for Utahns. Please let Utahns and expert groups, determine other actionable steps to be taken. Do not destroy Big Cottonwood. Do not take further action that will have unknown consequences. Utahns climate cannot take it.
