Comments: Hello,

We live in the avon valley and have for years. We have ran cows on the ophir/ hope creek forest allotment. The proposed mine drilling and potential mine that could come with this will be greatly impact us in a negative way. The potential pollution as well as all of the mine traffic going up and down the roads we use will be a problem for both us and our cattle. Please reconsider no demanding a more thorough environmental impact study as well as the effects a drilling operation and potential mine would have on our little community.
