Comments: Is the Black Hills turning into a tree factory or remaining a forest? From reading the proposal I see the FS has come up with new terms to disguise what is happening to the beautiful Black Hills Forest. While I agree it should be managed I don't agree that it should be destroyed. I was glad to see some tree planting. Be careful. We all love the forest and some of it has started to look like the apocalypse and has scattered wildlife to find new homes. Further, why doesn't the logging companies or the FS ever have to clean up after themselves? It is an eyesore to see all of the trees ripped up as well as the ground underneath the huge equipment that leaves ruts and roots behind. Shameful.
