Comments: As a previous landowner of property on the Little BLACKFOOT River I am very concerned about this proposed permit nothing like this should ever be fast-tracked. I am well aware of the damage caused by historical mining in this waterway as evidenced by previous cleanup's that have occurred in the area there is no reason to repeat history here. Impacts to sensitive west slope cutthroat trout are inevitable. Substantially more modeling of groundwater and floodplain impacts are critically important . This permit process needs to stop!
