First name: John

Last name: Bignell

Organization:

Title:

Comments: We live and work and have our livelihood in this proposed area. Our cattle run on the forest where this mine will take place. We respectfully ask that a full Environmental Impact Study be completed so that we and the others in the valley that call this place home will have a complete idea of how this mining operation will effect our water, grazing, road maintenance, and tax base now and in the future.
