First name: Mary

Last name: Graveley

Organization:

Title:

Comments: We need to let this non-invasive, well controlled exploration continue. We, the U.S. needs to be able to supply some of our own resources and have jobs right here for our future generations. If you don't let U.S. companies mine, foreign companies will and then you will have lost minerals/resources, jobs, and control and/or recourse. This company is solid. This project is scoped to be non-invasive.
