Comments: It has come to my attention that you are fast tracking the proposed Blue Copper Mine. This is such a big project that it is inconceivable to me that you are not allowing the proper public hearings and comment periods. This is on Public Land after all. And the public deserves to have say in it, especially since the potential water use and pollution is so extensive and far reaching! For by not doing so, you are leaving the impression that something greedy and underhanded is going on.

So please do the right thing by scheduling public hearings and extending the public comment period by at least 30 days, if not more.
