Title:

Comments: The uptick in health issues caused by the spraying of chemicals in
The state parks, schools, parks and other areas that citizens of
Utah walk and play in needs to be stopped. Our children and elderly are sicker than ever because of the science
and data that UPHE.org has proved. This is a violation of our health freedom. Utah claims to be conscious of
being green friendly but the state still allows the spraying of poisons

There are other solutions we would like to provide to the state. [Www.Stopsprayingglyphosate.Com](http://www.Stopsprayingglyphosate.Com)
We would live to offer support and funding for a trial area to show you how it can be done without poison for our
citizens.

Laurie Gagan
