Comments: I am writing to comment on Big Bear Mountain Resort Master Development Plan Projects (USFS-283463), and I have serious concerns.

I am particularly worried about the footprint and long-term impacts of this infrastructure on public land.

The San Bernardino Forest is a place that matters to me. I hike many miles there. If this goes through, my freedom to enjoy public lands in their natural state. Seeing the natural beauty marred by machinery and development will become a permanent stain on nature's beauty. Old-growth trees will be forever lost, and the landscape will fundamentally change.

I urge U.S. Forest Service to fully analyze these impacts, consider alternatives that protect public lands, and take public input seriously. Thank you for considering my comment.
