Comments: Hello,I am writing to express my concern with one element of the proposed improvement plan.Chair 7 is in need of an update, but the proposed plan is very vague about the proposedlocation and the work needed to accommodate a new terminal location at the bottom of the skiresort."The top terminal would remain within its existing location, and the bottom terminal would berelocated slightly uphill towards the mountain.""Grading would be required at the top and bottom terminal locations to accommodate the largeterminals and guest access."Parts of the bottom of the Chair 7 area are designated Open Space and/or Wetlands. I feel very strongly that Open Space and Wetlands need to be preserved, if not expanded, and the vagueness of the proposed improvement is very problematic. The new station should be placed exactly where the existing station is located, barring any safety issues.Thank you for your consideration,Lu Holland
